Controls broadleaf weeds including clover, spurge, chickweed, dandelion, henbit, thistle, and many others. Works in cool weather down to 40 degrees. Do not spray in temperatures over 90 degrees. Safe for bluegrass, ryegrass, fescue, bermuda, & buffalo

Double Play

Weeds 'em Out Keeps 'em Out

Mix Rate: ?

Pre-Emergent/Post-Emergent Weed & Grass Control product which kills everything. Great for use on driveways, sidewalks, fences, and gravel areas and alleyways. It not only kills the plants in comes in contact with, but it prevents them for up to 4 months so they don't come back. Do not use in lawns.

Over - The - Top II Grass Killer (8 oz)

Mix Rate: 1 oz per gal.

Controls Annual and Perennial Grass Weeds in your flower beds. Kills many grasses like annual bluegrass, fescue and Bermuda. Safe to spray over the top of most of your plants. It can be used around vegetable gardens, trees, shrubs, ornamentals and ground covers. Check safe plant list before spraying.

Weed-Out Lawn Weed Killer

Mix Rate: 2 oz per gal

Controls broadleaf weeds including clover, spurge, chickweed, dandelion, henbit, thistle, and many others. Spray when temperatures reach above 75 degrees consistently. Safe for bermuda, fescue and bluegrass.

Super Concentrate Killzall Weed and Grass Killer (16 oz)

Mix Rate: 3 TBS per gal

Non-selective weed and grass killer, contains a double-surfactant formulation that dries on plant fast to start working quickly. Great for use near fences, in paths, patios, sidewalks, curbs and driveways. Do not use in lawns.

Turflon Ester Specialty Herbicide (8 oz)

Mix Rate: 3/4 oz per gal

Controls bermuda grass in bluegrass, perennial ryegrass and fescue. It also controls actively growing annual and perennial broadleaf weeds listed on the label.

Spreader Sticker (8 oz)

Mix Rate: 1 oz per gal.

A water soluble spray additive that increases absorption, translocation and sticking of pesticides. Mix with insecticides, miticides, fungicides, and herbicides to get a better "stick" to th plant.
